**Sublime™** is the only product on the market powered by the combination of triclopyr, dicamba and mesotrione. This innovative non-phenoxo formulation reliably delivers a much wider spectrum of selective, post-emergent and residual control, particularly on many of the most challenging broadleaf and grassy weeds in turfgrass. In addition to an unprecedented level of performance, the unique blend of active ingredients in **Sublime™** suppresses the common and unsightly bleaching symptoms that can be caused by mesotrione alone.

**PRODUCT BENEFITS**

- Outstanding broadleaf weed control, including spurge, yellow woodsorrel and wild violet
- Proprietary, non-2,4-D formulation
- No unsightly weed bleaching commonly caused by mesotrione
