DIAMMONIUM PHOSPHATE

18-46-0

- Provides balanced nutrients for stimulating root growth
- Excellent source for stimulating uptake of Phosphorus and Nitrogen
- Provides temporary soil alkalization of pH and conversion to Nitrates
- Highly soluble and quick dissolving in soil
- Helps release Phosphate and Ammonium for plant use
- Essential nutrient for better and healthier plants
- Soil test for pH prior to use is suggested

40 lbs
MODEL # GDAP-40

GUARANTEED ANALYSIS:

Total Nitrogen (N) 18.0%
 15.5% Ammoniacal Nitrogen
 2.5% Urea Nitrogen
 Available Phosphate (P₂O₅) 46.0%

DERIVED FROM: Diammonium Phosphate (DAP) and Urea

CAUTION: Avoid inhalation and ingestion. Use eye protection and mask when handling. Prolonged contact may cause irritation of eyes, nasal passages and skin. Keep away from children and animals. Breathing dust may be harmful to your respiration, nervous system and kidneys.

APPLICATION RATES: Recommended application rate is 3lbs/1,000 sq. ft and you can apply this every 2-3 weeks if you are looking to correct a severe deficiency. However, we recommend you retest after 2-3 applications (wait 60 days after any application to retest). If you still have a deficiency, apply more the following season. You do not have to correct every deficiency in one month.

The **application rate** depends on the quality of your soil. However, we recommend applying 2 pounds per 100 sq. ft or 2 tablespoons per gallon of water for maintenance purposes — 24 lbs covers 12000sf.

STORAGE AND HANDLING: Keep stored in a dry and low humidity location for long term storage. Do not store below 60° F.
