

# TERRACLOR® 400

## Flowable Ornamental Fungicide

A PROTECTIVE FUNGICIDE FOR CONTROL OF SOIL-BORNE FUNGAL DISEASES OF ORNAMENTALS GROWN IN GREENHOUSES, SHADEHOUSES, NURSERIES, LANDSCAPE PLANTINGS, AND VEGETABLE BEDDING PLANTS.

### Product Information Bulletin

941

#### GENERAL INFORMATION

**Terraclor® 400** is an effective soil fungicide for the prevention and control of soil borne pathogens caused by *Rhizoctonia solani* and other soil borne diseases.

**Terraclor 400** is a 40% flowable formulation of the active ingredient Pentachloronitrobenzene (PCNB) and contains four (4) lbs. A.I. per gallon.

**Common Name:** PCNB

**Class:** Aromatic Hydrocarbons

**GROUP** 14 **FUNGICIDE**

**Packaging:** 1 gallon container, 4 per case

#### RESTRICTED ENTRY INTERVAL (REI) AND SIGNAL WORD

REI = 12 hours

Signal Word = CAUTION

#### PERSONAL PROTECTION EQUIPMENT (PPE)

- long sleeved shirt and long pants
- chemical-resistant gloves such as barrier laminate, or nitrile rubber, or neoprene rubber or viton
- shoes plus socks

#### MODE OF ACTION

**Terraclor 400** works by inhibiting lipid peroxidation. **Terraclor 400** works primarily as a preventative agent through contact activity, and should be applied before disease symptoms appear in order to achieve optimum results. However, **Terraclor 400** has curative properties as well.

#### USE SITES

**Terraclor 400** may be used on ornamental plants grown in commercial greenhouses, shadehouses, and nurseries. **Terraclor 400** binds rapidly to organic matter. Irrigation will not wash it off.

#### APPLICATION RATES

**Terraclor 400** should be soil applied as a drench or incorporated thoroughly into the soil for best results.

As a drench, apply 6-12 fl. oz. per 100 gal. over an area of 400 to 800 sq. ft. depending on depth of control desired. See label for more details.

**Terraclor 400** may be applied as a foliar spray for control of magnolia leaf spot.

#### Note:

The mixture of **Terraclor 400** and water should be continuously agitated to assure uniform applications.

#### KEY DISEASES CONTROLLED

- *Phyllostica cookeri* - Magnolia Leaf Spot
- *Rhizoctonia solani* or *Pellicularia filamentosa* - Root Rot / Stem Rot
- *Sclerotium rolfsii* or *Pellicularia rolfsii* - Bulb Rot /Crown Rot

#### TANK MIXING

Tank mixing is permitted with **Terraclor 400**. For broader spectrum disease control **Terraclor 400** can be tank mixed with Terrazole®. Growers should test for compatibility and make sure to follow all directions and precautions on labels prior to application.

#### Drench Solutions for Rhizoctonia

Solutions should be applied as a drench directed at the soil surface.

Product	Preventative Program	High Disease Pressure	Residual
Terraclor 400	6-8 fl. oz.	12 fl. oz.	14 - 28 days
OHP 6672™ 4.5 F or OHP 6672™ 50 WP	12-16 fl. oz. 12-16 oz.	12-16 fl. oz. 12-16 oz.	7 days
OHP Chipco® 26019 N/G	6.5 oz.	6.5 oz.	3 - 7 days

Compass® O at 2 oz. per 100 gal. may also be used in any of these rotation positions.
